Among the actions taken in the Order on Reconsideration:

- Revised technical rules to enhance the ability of WCS licensees to deploy mobile broadband networks while establishing additional safeguards to protect neighboring SDARS, AMT, and DSN networks from harmful interference.
- Prohibited WCS mobile and portable devices' transmissions in WCB Blocks C and D to further protect SDARS operations.
- Relaxed the WCS licensee notification requirements regarding low-power WCS stations and minor WCS station modifications, and clarified WCS notification and coordination

procedures.

- Restarted and provided a limited extension of the WCS performance periods to enable licensees to respond to revisions of technical rules.

The information filed by WCS licensees in support of their construction notifications will be used to determine whether licensees have complied with the Commission's performance benchmarks. Further, the information collected by licensees in support of their coordination obligations will help avoid harmful interference to SDARS, AMT and DSN operations in other spectrum bands.
